

Vision

BooMyAsset started with the simple and yet ambitious vision of becoming the world's local currency across all borders & platforms. So we have developed the token called BMA along with a flagship Crypto wallet called TrustAsset . AT the heart of BMA token is the idea of bringing in a World Class scalable security & Utility together and change lives by infusing our in house technologies to bring crypto in everyday life and how it is used everyday .

We at BMA aim to become a token of choice for millions of users and thousands of utilities compassing every payment aspect of daily life providing a very secure and sanitized platform to interact with peers, companies, e-commerce, trading and multiple of other use case scenarios. A world which enables new – fairer, more inclusive and more efficient – forms of human organizations and governance. We strongly believe that realizing this vision can significantly advance our society.

Anyone who wants to change the world for the better knows humanity's greatest challenges will only be overcome by a collective global movement. We all must work together in ways previously unimagined to successfully combat climate change, address threats to the environment, bring equity to our societies and ensure companies act in the best interests of all stakeholders. Taking on our world's greatest sustainability challenges requires collaborative action. And so, our aspiration is clear: We seek to multiply individual impact to unleash our collective potential for sustainability. Empowered by blockchain and other technologies, we are building partnerships that will catalyse and support the coming sustainability transition. Previously, individuals had limited power to address the critical challenges of our time. As we enter the Web3 era, we will build platforms to put sustainability within reach.

2023 - Establishment of the BMA Project

- BMA ICO
- BMA Foundation formed
- BMA Steering Committee Formed

2024 -
Whitepaper 1
Launch Trust Asset
Launch BokkMyTour

Journey from Web 1.0 to Web 3.0

WEB 1.0 1990-2005 --Introduction of the Web Users read content on static sites Publishers collect revenue

WEB 2.0 2005-2020 -- Rise of the Platform Users both read and create content Networks and platforms control creators' revenue streams in a centralized manner

WEB 3.0 2020+ -- Emergence of the Semantic Web Users read, create, and own their content and exchange value Users transact their data across decentralized, blockchain-based networks without using third parties

2. Token Overview:

- Name of the token. : Bookmyasset
- Symbol/Ticker. : BMA
- Total supply. : 21 Millions
- Initial distribution plan.

- 5% - Development
- 5% - Marketing
- 5% - Promoter

5. Use Cases:

1. We have several tokens in the crypto space and each one has their unique use & several wallets which is used to store assets, send, swap and buy assets. This craters to only crypto users & their peers. Real world usage is abormally low.

2/. We plan to bring universal utility to this ecosystem, by aiming to be the one of its kind token, where we can utilize our token in **various** web3 e-commerce projetcs. Starting from buyng your daily groceries, to your fasionrequirements, to payig your monthly bills, bookinfg your vacation and so many other cross platform ecosystems. not only that, We plan to upgrade our robust wallet to one stop such wallet for performing all of the above actions from a single secured Window.

3. In an ideal situation of the BMA ecosystem one should be able to buy air tickets from inside thw wallet, or pay for their electricity bill, buy a new laptop, send crypto to friends & family, stake/conert their crypto, buy & sell crypto against fiat currency by a few taps of the finger

TrustAsset

At the center of BMA's ecosystem is its non-custodial secured and super fast crypto wallet called TrustAsset. Its a wallet that supports multiple tokens o the Binance smart chain currently. Development is on to make it a one stop wallet for all major Blockchains and their particiaptng tokens. We are going to implement swap function in the first upgrade and then itnroduce mlti chain bridge swap facility. Beta development is on to introduce – a p2p marketplace within the wallet , a staking capacity from within the wallet & introduce OTC functionality to buy crypto using Credit/Debit card directly ffrom the wallet.

BookMyTour:

BMA's second offering stems from the universality of its token and the very fundamental basis of crypto. A decentralized but a connected world . So we are going to introduce to the community and the billions of people in the larger scope , a complete travel portal for all your travel requirements – Flights, Trains, Cruises, Hotels , Vacationing . BookMyTour will support payments through our own native BMA token along with several other Stable Coins .

ROADMAP
